

ANTI-GRAVITY PROMPT SEQUENCE

Election Guide Assistant

Build it right, session by session.

9 copy-paste-ready sessions across 3 phases

Sessions	9 total (Phase 1: 2 · Phase 2: 3 · Phase 3: 3 · Rules: 1)
Stack	React + Tailwind CSS
Project	Interactive Election Guide Assistant
Rule	Strictly non-partisan — educational content only
Version	v1.0

How to Use This Guide

This guide is your step-by-step build plan for the Election Guide Assistant using Anti-Gravity or any AI coding tool. Each session contains two things to copy and paste in order — a Context Block and a Prompt. Run one session at a time. Do not skip ahead.

1	Open Anti-Gravity and start a new project session.
2	Pick a session below — go in order, Phase 1 → 2 → 3.
3	Copy the Context Block and paste it into Anti-Gravity first.
4	Copy the Prompt and paste it in immediately after.
5	Review the output before moving to the next session.
6	If something breaks, see the Golden Rules on the next page.

■ Golden Rules — Apply Every Session

◆ Always paste the Context Block first	Give Anti-Gravity project context before any build instruction.
◆ One session at a time	Never paste multiple sessions together — it causes broken, half-finished output.
◆ If something breaks	Say: "Revert only the last change and try a simpler approach."
◆ Style-only fixes	Say: "Do not change any logic. Fix only the CSS/styling."
◆ Preserve existing code	Start each new session with: "Keep all existing code intact."
◆ Mobile first	Always test on a 375px viewport before checking desktop layout.

PHASE 1

Scaffold & Setup

2 sessions · Complete all before moving to the next phase

Set up the project foundation before writing any feature code. Getting the layout, navigation, and design system right at this stage saves major rework later.

SESSION 1.1

Project Setup & Layout

■ **Before you paste:** Run this first — before writing any code. This sets the entire foundation.

■ STEP 1 — PASTE THIS CONTEXT BLOCK FIRST

Project: Interactive Election Guide Assistant

Stack: React + Tailwind CSS

Colors: Primary #1A3C6E | Accent #2E75B6 | Gold #C9A84C | Light BG #EBF2FA

Font: Inter (Google Fonts)

Rule: Strictly non-partisan. No political opinions, party names, or candidate references ever.

— ■ STEP 2 — PASTE THIS PROMPT

Build a mobile-first interactive election guide web app using React and Tailwind CSS.

Set up the main layout with:

- A sticky header: logo on the left, dark mode toggle (sun/moon icon) on the right
- A sidebar navigation on desktop with 5 links: Home, Timeline, Eligibility, FAQ, My Progress
- On mobile: collapse the sidebar into a bottom navigation bar with icons only (no text)
- A main content area that fills the remaining space with smooth scroll behaviour

Use this exact color palette throughout:

Primary: #1A3C6E

Accent: #2E75B6

Gold: #C9A84C

Light BG: #EBF2FA

Body text: #333333

Muted text: #64748B

Load Inter from Google Fonts. Set base font-size to 16px and line-height to 1.6.

All interactive elements must have a visible focus ring for keyboard accessibility.

SESSION 1.2

Hero Section

■ **Before you paste:** Keep all existing code intact. Only add the Hero section below the header.

■ STEP 1 — PASTE THIS CONTEXT BLOCK FIRST

Project: Interactive Election Guide Assistant

Stack: React + Tailwind CSS

Colors: Primary #1A3C6E | Accent #2E75B6 | Gold #C9A84C | Light BG #EBF2FA

Font: Inter (Google Fonts)

Rule: Strictly non-partisan. No political opinions, party names, or candidate references ever.

— ■ STEP 2 — PASTE THIS PROMPT

Keep all existing code intact. Add a Hero section component only.

The Hero section must include:

- Headline: "Your Election, Explained." – bold, large display size, Primary blue (#1A3C6E)
- Subheadline: "A simple guide to understanding and participating in the election process." – muted gray
- Two CTA buttons:

"Get Started" (filled, Accent blue #2E75B6) – smooth scrolls to the Election Timeline

"Check My Eligibility" (outlined, gold border #C9A84C) – smooth scrolls to the Eligibility Checker

- A subtle animated background using CSS keyframes:

Civic icons (ballot box, checkmark, flag emoji) drift slowly at different speeds and fade in/out

No political symbols, party colors, or partisan imagery whatsoever

- Responsive layout: stacked single-column on mobile, two-column with illustration on desktop

PHASE 2

Core Features

3 sessions · Complete all before moving to the next phase

Build the three main interactive features one at a time. Each session must be completed and reviewed before starting the next.

SESSION 2.1

Interactive Election Timeline

■ **Before you paste:** This is the most important feature. Review it carefully before moving to Session 2.2.

■ STEP 1 — PASTE THIS CONTEXT BLOCK FIRST

Project: Interactive Election Guide Assistant

Stack: React + Tailwind CSS

Colors: Primary #1A3C6E | Accent #2E75B6 | Gold #C9A84C | Light BG #EBF2FA

Font: Inter (Google Fonts)

Rule: Strictly non-partisan. No political opinions, party names, or candidate references ever.

— ■ STEP 2 — PASTE THIS PROMPT

Keep all existing code intact. Add an Interactive Election Timeline component with exactly 6 stages:

Stage 1 – Voter Registration Icon: ■

What it covers: How to register, key deadlines, eligibility basics

User action: Check your registration status and register before the deadline

Stage 2 – Candidate Nomination Icon: ■■■

What it covers: How candidates qualify and get their name on the ballot

User action: Learn who is running in your local area

Stage 3 – Campaigning Period Icon: ■

What it covers: What candidates do during campaigns, debates, campaign finance basics

User action: Research candidates and their publicly stated positions

Stage 4 – Voting Day Icon: ■■

What it covers: Where to vote, what ID to bring, how the ballot works

User action: Make a voting plan – know your polling station and arrange time off

Stage 5 – Vote Counting Icon: ■

What it covers: How votes are counted, who the observers are, verification process

User action: Follow only official channels for results

Stage 6 – Result Announcement Icon: ■

What it covers: How results are certified and officially announced

User action: Stay informed from official government sources only

Requirements:

- Each stage is clickable and expands smoothly to show full detail
- Active/selected stage: gold left border (#C9A84C) and light blue background (#EBF2FA)
- Linear progress bar across the top tracks which stage is open
- Desktop: vertical stack layout. Mobile: horizontally scrollable cards
- Smooth CSS transition (300ms ease) on expand/collapse

SESSION 2.2**Eligibility Checker**

■ **Before you paste:** Do not modify the timeline or hero. Only add the Eligibility Checker below the timeline.

■ STEP 1 — PASTE THIS CONTEXT BLOCK FIRST

Project: Interactive Election Guide Assistant

Stack: React + Tailwind CSS

Colors: Primary #1A3C6E | Accent #2E75B6 | Gold #C9A84C | Light BG #EBF2FA

Font: Inter (Google Fonts)

Rule: Strictly non-partisan. No political opinions, party names, or candidate references ever.

—■ STEP 2 — PASTE THIS PROMPT

Keep all existing code intact. Add an Eligibility Checker component below the timeline.

It is a 4-step guided questionnaire:

Step 1: "Are you 18 years of age or older?"

Step 2: "Are you a citizen of this country?"

Step 3: "Have you lived at your current address for at least 30 days?"

Step 4: "Are you registered to vote?"

For each step:

- Show large tap-friendly buttons: Yes / No / Not Sure (minimum 44px height)
- Show a "Step X of 4" progress indicator at the top
- Animate smoothly to the next step on selection

Result cards based on answers:

All Yes → "You're Ready to Vote! ■" + voting day tips

Eligible but not registered → "You're Eligible – Let's Get You Registered" + link to vote.gov

Not sure about registration → "Let's Check Your Registration" + link to vote.gov

Under 18 → "Not Quite Yet – But Your Time is Coming!" + eligibility date info

Not a citizen → "Thank You for Wanting to Participate" + gentle citizenship pathway info

Rules:

- Tone must be warm, encouraging, and never judgmental in all outcome messages
- Include a "Start Over" button on every result screen
- Do not store or transmit any user data

SESSION 2.3

FAQ Assistant Panel

■ **Before you paste:** Do not modify the timeline or eligibility checker. Only add the FAQ panel.

■ STEP 1 — PASTE THIS CONTEXT BLOCK FIRST

Project: Interactive Election Guide Assistant

Stack: React + Tailwind CSS

Colors: Primary #1A3C6E | Accent #2E75B6 | Gold #C9A84C | Light BG #EBF2FA

Font: Inter (Google Fonts)

Rule: Strictly non-partisan. No political opinions, party names, or candidate references ever.

— ■ STEP 2 — PASTE THIS PROMPT

Keep all existing code intact. Add a FAQ Assistant panel below the eligibility checker.

Include exactly 8 quick-reply chip buttons:

1. "How do I register?"
2. "When is voting day?"
3. "What ID do I need?"
4. "How are votes counted?"
5. "What if I make a ballot mistake?"
6. "Can I vote by mail?"
7. "Who observes the count?"
8. "I missed the registration deadline"

When a chip is clicked, display a clean answer card below it containing:

- A relevant emoji icon

- A bold question title
- A 2-3 sentence plain-language answer (neutral, factual civic content – no political opinions)
- A "View Official Source" link pointing to vote.gov

Also add a text input at the bottom: "Ask another question..."

- If the typed text loosely matches one of the 8 topics, show that answer card
- If no match: show "For the most accurate answer, visit vote.gov or contact your local election office."

Requirements:

- All chips must be keyboard accessible with visible focus rings
- Show only one answer card at a time
- All answer content is pre-written and vetted – never AI-generated political content

PHASE 3

Progress & Polish

3 sessions · Complete all before moving to the next phase

Add persistence, visual polish, and make sure the app works perfectly on every device and in every condition before final review.

SESSION 3.1

Personal Progress Tracker

■ **Before you paste:** Do not touch any other components. Only add the Progress Tracker feature.

■ STEP 1 — PASTE THIS CONTEXT BLOCK FIRST

Project: Interactive Election Guide Assistant

Stack: React + Tailwind CSS

Colors: Primary #1A3C6E | Accent #2E75B6 | Gold #C9A84C | Light BG #EBF2FA

Font: Inter (Google Fonts)

Rule: Strictly non-partisan. No political opinions, party names, or candidate references ever.

— ■ STEP 2 — PASTE THIS PROMPT

Keep all existing code intact. Add a Personal Progress Tracker component.

Checklist with exactly 6 items:

- I have confirmed my eligibility
- I am registered to vote
- I know the date and location of my polling station
- I have the required ID ready
- I have reviewed the candidates and ballot measures
- I have made a voting plan (transport, time off, childcare, etc.)

At the top of the page (just below the sticky header), add a persistent progress bar:

Text format: "X of 6 steps complete – [message]"

Encouraging messages by count:

0 steps: "Let's get you election-ready!"

1-2: "Great start – keep going!"

3-4: "You're more than halfway there!"

5: "Almost ready – one more step!"

6: "You're fully election-ready! ■"

Requirements:

- Checkboxes must be large and tap-friendly (minimum 44px height)
- Checked items: gold checkmark icon + strikethrough text
- Animate progress bar width smoothly (CSS transition 400ms) on each toggle
- Save ALL checkbox state to localStorage key "electionProgress" – must survive page refresh

- Add a "Reset My Progress" button at the bottom with a confirmation step before resetting

SESSION 3.2

Dark Mode

■ **Before you paste:** Do not change any logic or content. Only add dark mode theming.

■ STEP 1 — PASTE THIS CONTEXT BLOCK FIRST

Project: Interactive Election Guide Assistant

Stack: React + Tailwind CSS

Colors: Primary #1A3C6E | Accent #2E75B6 | Gold #C9A84C | Light BG #EBF2FA

Font: Inter (Google Fonts)

Rule: Strictly non-partisan. No political opinions, party names, or candidate references ever.

— ■ STEP 2 — PASTE THIS PROMPT

Keep all existing code intact. Add dark mode toggle functionality.

Dark theme color values:

Background: #0D1B2E

Card background: #142236

Primary text: #F0F4F8

Muted text: #94A3B8

Accent: #2E75B6

Gold: #C9A84C

Border: #1E3A5F

Requirements:

- The toggle is the sun/moon icon already in the header – wire it up
- Clicking it switches the ENTIRE app to the dark theme
- ALL components must adapt fully – no white boxes bleeding through in dark mode
- Add a smooth CSS transition (200ms ease) on toggle – absolutely no flicker
- Save preference to localStorage key "darkMode" – persist across visits and refreshes
- On first page load: read localStorage and apply the saved preference instantly before paint

SESSION 3.3

Final Mobile Polish & Accessibility

■ **Before you paste:** Do not change any logic or content. Fix styling, responsiveness, and accessibility only.

■ STEP 1 — PASTE THIS CONTEXT BLOCK FIRST

Project: Interactive Election Guide Assistant

Stack: React + Tailwind CSS

Colors: Primary #1A3C6E | Accent #2E75B6 | Gold #C9A84C | Light BG #EBF2FA

Font: Inter (Google Fonts)

Rule: Strictly non-partisan. No political opinions, party names, or candidate references ever.

— ■ STEP 2 — PASTE THIS PROMPT

Keep all existing code intact. Do not change any logic or content.

Only fix mobile responsiveness, performance, and accessibility.

Mobile fixes:

- On screens narrower than 640px: sidebar collapses to bottom nav bar with icons only (no labels)
- All buttons and interactive elements must be minimum 44px tall
- Timeline cards must scroll horizontally on mobile without breaking page layout
- FAQ chips must wrap cleanly on small screens without overflowing
- Ensure zero horizontal page overflow on any screen width

Performance fixes:

- Add loading="lazy" to any images
- Ensure Inter font loads with: font-display: swap
- Verify dark mode class is applied before first paint — no flash of wrong theme
- Ensure no cumulative layout shift (CLS) on initial page load

Accessibility fixes:

- All icon-only buttons must have descriptive aria-label attributes
- FAQ text input must have a visible label or aria-label
- Eligibility checker step buttons must be fully keyboard navigable with visible focus ring
- All body text must meet a minimum contrast ratio of 4.5:1 in both light and dark mode
- Run through the tab order and ensure logical focus flow top to bottom

You've reached the end. Now go build something great.

Election Guide Assistant · PRD v1.0 · Anti-Gravity Prompt Sequence Non-partisan · Educational only · Not affiliated with any government body
